

Hvis der er problemer med at åbne vores programmer fra Internet Explorer 9

Vælg funktioner – Internet indstillinger

The image shows a screenshot of an Internet Explorer 9 browser window displaying the ServicePoint website. The browser's address bar shows the URL `http://servicepoint.dk/Default.aspx`. The website header includes the ServicePoint logo and the tagline "SIKKERT, FLEKSIBELT, ØKONOMISK". Navigation buttons for "Om ServicePoint", "Kontakt os", "Login - Kundecenter", "Søg", and "Forsiden" are visible. A "Funktioner" menu is highlighted in the top right corner. The main content area features a "Logon" section with input fields for "User name" and "Password", and a "Log On" button. On the right side, there are widgets for "Start fjernsyn", "Webmail - Outlook", and "Sidste nyt: Nyt telefonsystem".

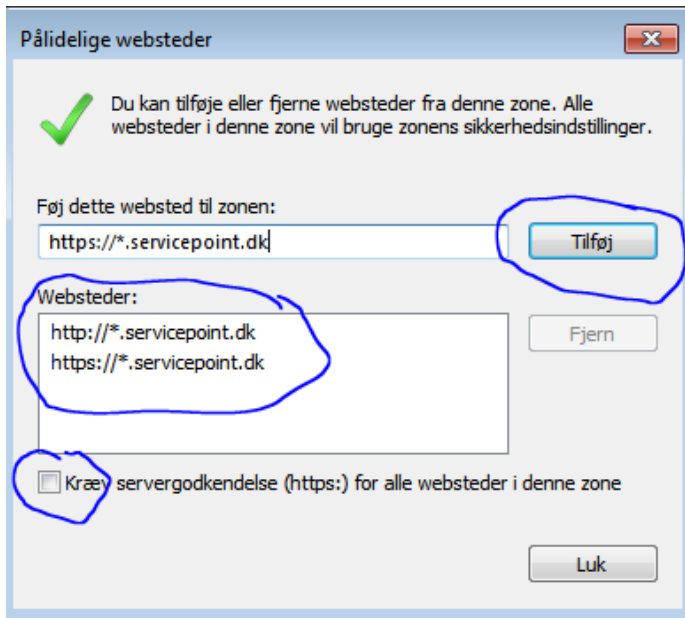

Overlaid on the bottom of the browser window is the "Internetindstillinger" (Internet Options) dialog box. The "Sikkerhed" (Security) tab is selected. The "Pålidelige websteder" (Feared Sites) zone is highlighted with a blue circle and contains a green checkmark. Below this, the "Websteder" (Sites) button is also circled in blue. The "Sikkerhedsniveau for denne zone" (Security level for this zone) is set to "Mellem" (Medium), with a description: "Spørger, før hentning af eventuelt skadeligt indhold" and "Ikke-signerede ActiveX-objekter hentes ikke". The "Aktivér beskyttet tilstand" (Enable Protected Mode) checkbox is checked. At the bottom of the dialog, the "Anvend" (Apply) button is visible.

Fjern vingebeben ved: Kræver servergodkendels

Tilføj disse to websteder til zonen

[http://\\*.servicepoint.dk](http://*.servicepoint.dk)

[https://\\*.servicepoint.dk](https://*.servicepoint.dk)

Luk.

Genstart browser og luk på igen.
